Table of contents, Volume 28, 2001

Abdelmoula M → Boursiquot S
Akaogi M → Kojitani
Alderson A, Evans KE: Rotation and dilation deformation mechanisms for auxetic behaviour in the α-cristobalite tetrahedral framework structure 711
Amthauer G → Grodzicki M
Amthauer G → Redhammer GJ
André G → Redhammer GJ
Andrault D, Bolfan-Casanova N: High-pressure phase transformations in the $MgFe_2O_4$ and Fe_2O_3–$MgSiO_3$ systems 211
Andreozzi GB, Hålenius U, Skogby H: Spectroscopic active $^{IV}Fe^{3+}$–$^{VI}Fe^{3+}$ clusters in spinel–magnesioferrite solid solution crystals: a potential monitor for ordering in oxide spinels 435
Andrut M → Harlov DE
Andrut M → Khisina NR
Angel RJ → Kung J

Baldomir D → Iglesias M
Barrón V → Van San E
Becker U, Gasharova B: AFM observations and simulations of jarosite growth at the molecular scale: probing the basis for the incorporation of foreign ions into jarosite as a storage minearl 545
Belokoneva EL, Gubina YK, Forsyth JB: The charge density distribution and antiferromagnetic properties of azurite $Cu_3[CO_3]_2(OH)_2$ 498
Benisek A → Bertoldi C
Bertoldi C, Benisek A, Cemič L, Dachs E: The heat capacity of two natural chlorite group minerals derived from differential scanning calorimetry 332
Binder K → Müser MH
Blagojević V → Nikolić PM
Blaha P → Iglesias M
Bocchio R → Pavese A
Bocquillon G → Léger JM
Boffa Ballaran T, Carpenter MA, Domeneghetti MC: Phase transition and mixing behaviour of the cummingtonite–grunerite solid solution 87
Bojičić AI → Nikolić PM
Bolfan-Casanova N → Andrault D
Bonaccorsi E, Merlino S, Pasero M, Macedonio G: Microsommite: crystal chemistry, phase transitions, Ising model and Monte Carlo simulations 509
Bosenick A → Palin EJ
Bosenick A, Dove MT, Heine V, Geiger CA: Scaling of thermodynamic mixing properties in garnet solid solutions 177
Boursiquot S, Mullet M, Abdelmoula M, Génin J-M, Ehrhardt J-J: The dry oxidation of tetragonal FeS_{1}-x mackinawite 600
Buseck PR → Dódony I

Caneo OB → Pérez-Maqueda LA
Carpenter MA → Boffa Ballaran T
Catti M: High-pressure stability, structure and compressibility of *Cmcm*-$MgAl_2O_4$: an ab initio study 729
Cemič L → Faßhauer DW
Cemič L → Bertoldi C
Chakhmouradian AR, Ross K, Mitchell RH, Swainson I: The crystal chemistry of synthetic potassium-bearing neighborite, $(Na_{1-x}K_x)MgF_3$ 277
Chateau C → Léger JM
Comodi P, Liu Y, Frezzotti ML: Structural and vibrational behaviour of fluorapatite with pressure. Part II: in situ micro-Raman spectroscopic investigation 225
Comodi P, Liu Y, Zanazzi PF, Montagnoli M: Structural and vibrational behaviour of fluorapatite with pressure. Part I: in situ single-crystal X-ray diffraction investigation 219
Cuadros J → Sainz-Díaz CI

Dódony I, Buseck PR: Polysomatism and modules of gehlenite composition and structure in the Hanic phase $(Ca_5Al_6MgSiO_{17})$ 428
Dachs E → Bertoldi C
Datas L → Van San E
De Grave E → Van San E
Desseyn HO → Van San E
Diella V → Pavese A
Domeneghetti MC → Boffa Ballaran T
Dove MT → Bosenick A
Dove MT → Palin EJ
Dove MT → Sainz-Diaz CI
Dresen G → Freund D
Dresen G → Heinemann S
Duan C-G → Liu J
Durić S → Nikolić PM

Ehrhardt J-J → Boursiquot S
Elazar J → Nikolić PM
Evans KE → Alderson A

Faßhauer DW, Cemič L: Heat of formation of petalite, $LiAlSi_4O_{10}$ 531
Farges F: Crystal chemistry of iron in natural grandidierites: an X-ray absorption fine-structure spectroscopy study 619
Farrell SP, Fleet ME: Sulfur K-edge XANES study of local electronic structure in ternary monosulfide solid solution $[(Fe, Co, Ni)_{0.923}S]$ 17
Fasshauer DW → Grevel K-D
Fei Y → Koch-Müller M

Fitz Gerald JD → Tan BH
Fleet ME → Farrell SP
Fleet ME, Liu X: Boron K-edge XANES of boron oxides: tetrahedral B–O distances and near-surface alteration 421
Foley JA, Wright SE, Hughes JM: Cation partitioning versus temperature in spinel: optimization of site occupants 143
Forsyth JB → Belokoneva EL
Freund D, Rybacki E, Dresen G: Effect of impurities on grain growth in synthetic calcite aggregates 737
Frezzotti ML → Comodi P
Frost DJ, Langenhorst F, van Aken PA: Fe–Mg partitioning between ringwoodite and magnesiowüstite and the effect of pressure, temperature and oxygen fugacity 455

Gaft M, Panczer G, Reisfeld R, Uspensky E: Laser-induced time-resolved luminescence as a tool for rare-earth element identification in minerals 347
Gasharova B → Becker U
Geiger CA → Bosenick A
Génin J-M → Boursiquot S
Golla U, Putnis A: Valence state mapping and quantitative electron spectroscopic imaging of exsolution in titanohematite by energy-filtered TEM 119
Gorelli F → Léger JM
Gournis D, Mantaka-Marketou AE, Karakassides MA, Petridis D: Ionizing radiation induced defects in smectite clays 285
Graetsch H: X-ray powder diffraction study on the modulated high temperature forms of SiO_2 tridymite between 110 and 220 °C 313
Grevel K-D, Navrotsky A, Kahl WA, Fasshauer DW, Majzlan J: Thermodynamic data of the high-pressure phase $Mg_5Al_5Si_6O_{21}(OH)_7$ (Mg-sursassite) 475
Grodzicki M, Heuss-Assbichler S, Amthauer G: Mössbauer investigations and molecular orbital calculations on epidote 675
Gualtieri AF: Synthesis of sodium zeolites from a natural halloysite 719
Gubina YK → Belokoneva EL

Haegele E → Shtukenberg AG
Haga N → Kusaka K
Hagiya K → Kusaka K
Haines J → Léger JM
Hålenius U → Andreozzi GB
Hama J, Suito K: Thermoelastic model of minerals: application to Al_2O_3 258
Hanfland M → Pavese A
Hardy JR → Liu J

Harlov DE, Andrut M, Melzer S: Characterization of NH_4-phlogopite $(NH_4)(Mg_3)[AlSi_3O_{10}](OH)_2$ and ND_4-phlogopite $(ND_4)(Mg_3)[AlSi_3O_{10}](OD)_2$ using IR spectroscopy and Rietveld refinement of XRD spectra 77
Harlov DE, Andrut M, Pöter B: Characterisation of buddingtonite $(NH_4)[AlSi_3O_8]$ and ND_4-buddingtonite $(ND_4)[AlSi_3O_8]$ using IR spectroscopy and Rietveld refinement of XRD spectra 188
Harlov DE, Andrut M, Pöter B: Characterisation of tobelite $(NH_4)Al_2[AlSi_3O_{10}](OH)_2$ and ND_4-tobelite $(ND_4)Al_2[AlSi_3O_{10}](OD)_2$ using IR spectroscopy and Rietveld refinement of XRD spectra 268
Harrison RJ, Redfern SAT: Short- and long-range ordering in the ilmenite–hematite solid solution 399
Hattori T, Tsuchiya T, Nagai T, Yamanaka T: Sequential high-pressure transformations of FeGeO3 high-P clinopyroxene ($C2/c$) at temperatures up to 365 °C 377
Hauri E → Koch-Müller M
Heaney PJ → Xu H
Heine V → Bosenick A
Heinemann S, Wirth R, Dresen G: Synthesis of feldspar bicrystals by direct bonding 685
Hernández-Laguna A → Sainz-Díaz CI
Hernández-Laguna A → Sainz-Díaz CI
Heuss-Assbichler S → Grodzicki M
Hughes JM → Foley JA
Hull S → Léger JM

Iglesias M, Schwarz K, Blaha P, Baldomir D: Electronic structure and electric field gradient calculations of Al_2SiO_5 polymorphs 67
Iishi K → Kusaka K
Islam MS → Jones A
Ito M → Nagasawa H

Jackson I → Tan BH
Jacobs MHG, Oonk HAJ: The Gibbs energy formulation of the α, β, and γ forms of Mg_2SiO_4 using Grover, Getting and Kennedy's empirical relation between volume and bulk modulus 572
Jephcoat AP → Kleppe AK
Jones A, Palmer D, Islam MS, Mortimer M: Ion migration in nepheline: a dielectric spectroscopy and computer modelling study 28

Kahl WA → Grevel K-D
Karakassides MA → Gournis D
Karato S → Lawlis JD
Khisina NR, Wirth R, Andrut M, Ukhanov AV: Extrinsic and intrinsic mode of hydrogen occurrence in natural olivines: FTIR and TEM investigation 291
Kihara K: Molecular dynamics interpretation of structural changes in quartz 365
Kitamura M → Shimobayashi N
Klapper H → Shtukenberg AG
Kleppe AK, Jephcoat AP, Olijnyk H, Slesinger AE, Kohn SC, Wood BJ: Raman Spectroscopic Study of hydrous wadsleyite (β-Mg_2SiO4) to 50 GPa 232
Knittle E, Phillips W, Williams Q: An infrared and Raman spectroscopic study of gypsum at high pressures 630
Koch-Müller M, Fei Y, Hauri E, Liu Z: Location and quantitative analysis of OH in coesite 693
Kohn SC → Kleppe AK
Kojitani H, Navrotsky A, Akaogi M: Calorimetric study of perovskite solid solutions in the $CaSiO_3$–$CaGeO_3$ system 413
Koppelhuber-Bitschnau B → Redhammer GJ
Kudoh Y: Structural relation of hydrous ringwoodite to hydrous wadsleyite 523
Kung J, Angel RJ, Ross NL: Elasticity of $CaSnO_3$ perovskite 35
Kusaka K, Hagiya K, Ohmasa M, Okano Y, Mukai M, Iishi K, Haga N: Determination of structures of $Ca_2CoSi_2O_7$, $Ca_2MgSi_2O_7$, and $Ca_2(Mg_{0.55}Fe_{0.45})Si_2O_7$ in incommensurate and normal phases and observation of diffuse streaks at high temperature 150
Kuwahara Y: Comparison of the surface structure of the tetrahedral sheets of muscovite and phlogopite by AFM 1

Langenhorst F → Frost DJ
Langer K → Taran MN
Lawlis JD, Zhao Y-H, Karato S: High-temperature creep in a Ni_2GeO_4: a contribution to creep systematics in spinel 557
Léger JM, Haines J, Chateau C, Bocquillon G, Schmidt MW, Hull S, Gorelli F, Lesauze A, Marchand R: Phosphorus oxynitride PON, a silica analogue: structure and compression of the cristobalite-like phase; P–T phase diagram 388
Lesauze A → Léger JM
Levy D → Pavese A
Levy D, Pavese A, Sani A, Pischedda V: Structure and compressibility of synthetic $ZnAl_2O_4$ (gahnite) under high-pressure conditions, from synchrotron X-ray powder diffraction 612
Lin CC: High-pressure Raman spectroscopic study of Co- and Ni-olivines 249
Liu J, Duan C-G, Ossowski MM, Mei WN, Smith RW, Hardy JR: Simulation of structural phase transition in $NaNO_3$ and $CaCO_3$ 586
Liu X → Fleet ME
Liu Y → Comodi P
Liu Z → Koch-Müller M
Lottermoser W → Redhammer GJ

Macedonio G → Bonaccorsi E
Majzlan FJ → Grevel K-D
Manceau A, Schlegel ML: Texture effect on polarized EXAFS amplitude 52
Mantaka-Marketou AE → Gournis D
Marchand R → Léger JM
Mei WN → Liu J
Melzer S → Harlov DE
Merli M → Pavese A
Merlino S → Bonaccorsi E
Mezouar M → Pavese A
Mihajlović P → Nikolić PM
Milman V → Winkler B
Mitchell RH → Chakhmouradian AR
Miura E → Shimobayashi N
Miyake A → Shimobayashi N
Montagnoli M → Comodi P
Morioka M → Nagasawa H
Mortimer M → Jones A
Mukai M → Kusaka K
Mullet M → Boursiquot S
Müser MH, Binder K: Molecular dynamics study of the α–β transition in quartz: elastic properties, finite size effects, and hysteresis in the local structure 746

Nagai T → Hattori T
Nagasawa H, Suzuki T, Ito M, Morioka M: Diffusion in single crystal of melilite: interdiffusion of Al + Al vs. Mg + Si 706
Navrotsky A → Grevel K-D
Navrotsky A → Kojitani H
Navrotsky A → Schoenitz M
Navrotsky A → Xu H
Nikolić PM, Durić S, Todorović DM, Vasiljević-Radović D, Blagojević V, Mihajlović P, Elazar J, Radulović KT, Bojičić AI, Urošević D: Application of the photoacoustic method for characterization of natural galena (PbS) 44
Nobes RH → Winkler B

Ohmasa M → Kusaka K
Okano Y → Kusaka K
Okita M → Yamanaka T
Olijnyk H → Kleppe AK
Oonk HAJ → Jacobs MHG
Ossowski MM → Liu J
Ota K → Yamanaka T

Palin EJ, Dove MT, Redfern SAT, Bosenick A, Sainz-Diaz CI, Warren MC: Computational study of tetrahedral Al–Si ordering in muscovite 534
Palmer D → Jones A
Panczer G → Gaft M
Pasero M → Bonaccorsi E
Paulus W → Redhammer GJ
Pavese A → Levy D
Pavese A, Diella V, Levy D, Hanfland M: Synchrotron X-ray powder diffraction study of natural P2/n-omphacites at high-pressure conditions 9
Pavese A, Diella V, Pischedda V, Merli M, Bocchio R, Mezouar M: Pressure–volume–temperature equation of state of andradite and grossular, by high-pressure and -temperature powder diffraction 242
Pérez-Maqueda LA, Caneo OB, Poyato J, Pérez-Rodríguez JL: Preparation and characterization of micron and submicron-sized vermiculite 61
Pérez-Rodríguez JL → Pérez-Maqueda LA
Petridis D → Gournis D
Phillips W → Knittle E
Pischedda V → Levy D

Pischedda V → Pavese A
Pöter B → Harlov DE
Poyato J → Pérez-Maqueda LA
Punin YO → Shtukenberg AG
Putnis A → Golla U

Radulović KT → Nikolić PM
Redfern SAT → Harrison RJ
Redfern SAT → Palin EJ
Redhammer GJ, Roth G, Paulus W, André G, Lottermoser W, Amthauer G, Treutmann W, Koppelhuber-Bitschnau B: The crystal and magnetic structure of Li-aegirine $LiFe^{3+}Si_2O_6$: a temperature-dependent study 337
Reisfeld R → Gaft M
Ross K → Chakhmouradian AR
Ross N → Schoenitz M
Ross NL → Kung J
Roth G → Redhammer GJ
Rousset A → Van San E
Rybacki E → Freund D

Sainz-Díaz CI, Cuadros J, Hernández-Laguna A: Analysis of cation distribution in the octahedral sheet of dioctahedral 2:1 phyllosilicates by using inverse Monte Carlo methods 445
Sainz-Diaz CI → Palin EJ
Sainz-Diaz CI, Hernández-Laguna A, Dove MT: Modeling of dioctahedral 2:1 phyllosilicates by means of transferable empirical potentials 130
Sainz-Diaz CI, Hernández-Laguna A, Dove MT: Theoretical modelling of *cis*-vacant and *trans*-vacant configurations in the octahedral sheet of illites and smectites 322
Sani A → Levy D
Schlegel ML → Manceau A
Schmidt MW → Léger JM
Schoenitz M, Navrotsky A, Ross N: Enthalpy of formation of $CaSi_2O_5$, a quenched high-pressure phase with pentacoordinate silicon 57
Schwarz K → Iglesias M
Shimazu H → Yamanaka T
Shimobayashi N, Miyake A, Kitamura M, Miura E: Molecular dynamics simulations of the phase transition between low-temperature and high-temperature clinoenstatites 591
Shtukenberg AG, Punin YO, Haegele E, Klapper H: On the origin of inhomogeneity of anomalous birefringence in mixed crystals: an example of alums 665
Skogby H → Andreozzi GB
Slesinger AE → Kleppe AK
Smith RW → Liu J
Suito K → Hama J
Suzuki T → Nagasawa H
Swainson I → Chakhmouradian AR

Tan BH, Jackson I, Fitz Gerald JD: High-temperature viscoelasticity of fine-grained polycrystalline olivine 641
Tangeman J, Xirouchakis D: High-temperature heat capacity and thermodynamic properties for end-member titanite ($CaTiSiO_5$) 167
Taran MN, Langer K: Electronic absorption spectra of Fe^{2+} ions in oxygen-based rock-forming minerals at temperatures between 297 and 600 K 199
Todorović DM → Nikolić PM
Treutmann W → Redhammer GJ
Tsuchiya T → Hattori T

Ukhanov AV → Khisina NR
Urošević D → Nikolić PM
Uspensky E → Gaft M

van Aken PA → Frost DJ
Van San E, De Grave E, Vandenberghe RE, Desseyn HO, Datas L, Barrón V, Rousset A: Study of Al-substituted hematites, prepared from thermal treatment of lepidocrocite 488
Vandenberghe RE → Van San E
Vasiljević-Radović D → Nikolić PM

Warren MC → Palin EJ
Williams Q → Knittle E
Winkler B, Milman V, Nobes RH: A theoretical investigation of the relative stabilities of Fe-free clinozoisite and orthozoisite 471
Wirth R → Heinemann S
Wirth R → Khisina NR
Wood BJ → Kleppe AK
Wright SE → Foley JA

Xirouchakis D → Tangeman J
Xu H, Heaney PJ, Navrotsky A: Thermal expansion and structural transformations of stuffed derivatives of quartz along the $LiAlSiO_4$–SiO_2 join: a variable-temperature powder synchrotron XRD study 302

Yamanaka T → Hattori T
Yamanaka T, Okita M: Magnetic properties of the Fe_2SiO_4–Fe_3O_4 spinel solid solutions 102
Yamanaka T, Shimazu H, Ota K: Electric conductivity of Fe_2SiO_4–Fe_3O_4 spinel solid solutions 110

Zanazzi PF → Comodi P
Zhao Y-H → Lawlis JD
